

Social Responsibilities

“Every individual has a place to fill in the world and is important in some respect whether he/she chooses to be so or not.”

This is often being pointed out that 21st century education is going to be in many ways different from what it used to be in the past. Experts have argued that learners will have to develop an ability to be able to unlearn, relearn and then realign themselves according to needs of the society particularly in a country like India. The idea of students and social responsibility is important to reflect as we have successfully implemented the right to education for over a decade now and created a robust system of education with millions of School level and thousands of higher education institutions.

Community related programs /activities are encouraged in SPW Polytechnic to impart awareness in rural environment.

- Conducted awareness programme on creating best opportunities among girl students in this competitive world.
- Conducted extra sessions on the advancements and applications of latest trends in operating mobiles.
- Educate the students with the advancements in the field of e-Banking transactions and advancements.
